

HUSQVARNA LC 56 AWD

Robust and highly efficient collector mower with market unique All-Wheel drive performance. Excellent for larger sized hilly gardens with steeper slopes or less-often managed areas with higher grass. The AWD system also can track in a superior fashion across hills through drainage ditch areas. Built on a durable, welded steel cutting deck, handle system with the innovative TwinControl system and provided with a strong and easy-start OHC-engine. The LC 56-series offers three cutting methods to choose between.

Crown Cut blade

The Crown Cut blade has been developed for lifting the cutting result to a new level. Its very innovative design ensures optimum collection and BioClip performance.

Twin Control

Twin Control, the two-hand speed control makes it easy to work with the suitable ground speed, depending of the surface and surroundings.

All-Wheel Drive (AWD)

All-Wheel-Drive (AWD) ensures traction on uneven, wet and slippery areas and slopes.

Trio Clip

Three different cutting systems in one machine. Choose between collection, BioClip® or side ejection.

BioClip®

The grass is cut into small pieces that quickly decompose and return to the lawn as fertiliser, also making the lawn more drought resistant.

Extra large collector

Makes this mower suitable for somewhat bigger lawns.

Additional features

Handle height adjustment

Adjustable handle height for improved ergonomics.

Foldable handle

For easy storage and transportation. When the handle is locked in the folded position, it is possible to horizontally lift and carry the mower by the handle.

Water hose connection

Facilitates cleaning of the cutting deck. Attach the hose, turn on the water and start the engine and you will get a cleaner deck. For optimum results, clean the mower directly after use.

Ergonomic soft-grip handle

The handle with moulded soft-grip is angled for optimum comfort and ergonomic control. In addition, Operator Presence Control is integrated into the handle grip for easy use and comfort.

Honda engine

Easy-to-start, powerful Honda engine.

Technical Specifications

Engine Type/Name	Honda GCV 160	Blade type	Crown Cut Blade
Cylinder Displacement/Hp	160cm ³ /4 Hp	Cutting Width	56 cm/22"
Weight	41.3 kg	Cutting Height, min-max	38.1/107.95 mm
Fuel Tank Volume	0.9 Liter	Cutting Height Steps	9
Drive System	Twin Control	Cutting Height Adjustment	Four-Point
Drive Wheels	All Four	Collector Type	Fabric
Cutting Deck Material	Steel		
Cutting Methods	Collection/ BioClip®/Side Discharge
